

Mission Statement for the European Union

The origins of the European Union lie in the ambition to guarantee peace in Europe. The fact that war between the nations of Europe is no longer conceivable is evidence of its success. However, in the 21st century, Europeans face new challenges and opportunities of war. This Mission Statement outlines where action at European level is needed. That's why we joined the war in Yougoslavie and created the European Defense Agency. We fool you with the Idea this army will be independent from the US army.

The EU's mission is as agreed in the Lisbon Treaty to participate in conflicts outside Europe:

To guarantee peace, freedom and security in and around Europe we approved to give all privacy data to Swift and the Airport Authorities for transfers of money or people to the United States. That's why we keep lists of terrorists like members of Green Peace.

To promote and protect democracy and universal rights in Europe and around the world. That is why we respect the Irish, Dutch and French Referendums and like to allow citizens the principle of equality and submit the Lisbon treaty to referendums.

To enhance participation of citizens we created the EU constitution in a closed council and Giscard d'Estaing confirmed it is easy the Lisbon Treaty is unreadable.

To strengthen Europe's economy and to promote solidarity around Europe by working in partnership with national, regional and local government. That is exactly why we want to maintain a certain number of people jobless in order to keep wages down.

To make it easy for Europe's citizens to live and work throughout the Union. That is why we listen to 130 000 lobbyists of the big farma and weapon industry to help us outline the commun european strategie that keeps wages down and economy up.

To promote equality and tolerance of diversity in Europe. That is why we build upon a fortress of Europe and have in each country new closed prison centers for the poor that want to steal our wealth, the so called immigrants and refugees.

To promote and facilitate cooperation between Europeans, at individual, local, regional and national level, and in both the public and private sectors. That is why we allow Polish workers to work for 400 E in Holland where minimum wages are 1200 E

To protect Europe's environment. That is why we are in favor of nations to pay for the the impact of vulture capitalisme and leave the responsibility of making profit to the multinationals unharmed. We find we need a global carbon tax and government.

To ensure that Europe's voice is heard in the world, we participate in the WHO, WTO the CFR and Worldbank, IMF, United Nations. We take decisions for you so you can sleep on your two ears when we attend the Bilderberg conference.

To listen to its citizens, be accountable to them and work for them in a transparent and decentralised way. That is why the decision makers (commissioners) are not elected and the european parliament has no right to initiate laws. This policy corresponds to the rescuing of the banks and not the peoples savings in a decentralised way by national taxpayers. We will build up a modern performant European army because citizens ask for more war.
